

ASP4825MKEU | Targus Defcon® Master Key Cable Lock

Targus DEFCON® KL is a key locking security cable for your laptop. A sturdy locking device featuring a steel cable with a pass through loop on one end and key lock on the other, any attempts to remove the cable lock will noticeably damage the laptop preventing resale and therefore discouraging theft.

The lock utilises the security lock slot already built into your laptop. Each DEFCON® KL is supplied with 2 identical keys giving you the peace of mind of a back-up key.

This product is bulked packed in a set consisting of 25 pieces. Two master keys are supplied, enabling secure access to all locks even when keys are misplaced.

Deters theft, protects any laptop, projector or monitor equipped with a security lock slot

Designed to fit the security lock slot already built into your laptop

Key locking mechanism, no combination access code necessary

185cm vinyl-coated galvanized steel cable protects your laptop
